Bijection, finite sets
⊔; follow each orbit
partiality
PInj
⊔; the join of the unrollings
permutation matrices
Unitary
⊕; the coherent loop
allocation
the heap
Isometry ≃ R[Unitary]
⊕; an allocation,
then the coherent loop
hiding
the garbage
CPTP ≃ L[R[Unitary]]
no coherent sum trace
N
⊆
ℰ, with θ and φ:
not a traced functor
Int(Unitary)
compact closed; the canonical trace
CPTR
classical ⊕; the measured loop
