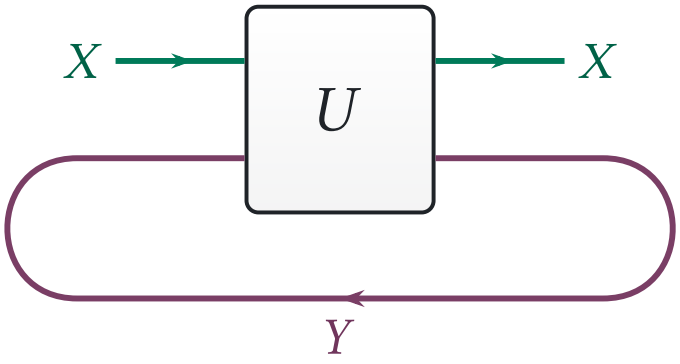
(a) the loop, drawn as feedback *(b) the same composite in* $\mathrm{Int}(\mathscr{C})$



=

	$I \oplus \eta$	$I \oplus \sigma$	$NU \oplus I$	$I \oplus \varepsilon$
in $\mathscr{C}$:	$I_{X \oplus Y}$	$I_{X \oplus Y \oplus Y}$	$U \oplus I_Y$	$I_{X \oplus Y}$

between two slices the object is $(X \oplus Y,\ Y)$
